## 1 Basics

You can make words **bold**, *italic*, underlined, `code` and `verbatim`, and, if you must, ~~strike-through~~. Text in the code and verbatim string is not processed for Org mode specific syntax, it is exported verbatim.

Some Greek like  $\alpha$ ,  $\beta$  and  $\gamma$ .

And here is an example link to [org-mode](#) homepage.

## 6 Sections

### 6.1 Lord of the Rings

My favorite scenes are (in this order)

1. The attack of the Rohirrim
2. Eowyn's fight with the witch king wha wei flew ieow

foi oiw flew woe sdoifjsdoif woiejfwewoifj woejfiwoe owef 中文测试测试

- 234 测试人材新技术 os2234
- this was already my favorite scene in the book
- I really like Miranda Otto.

1. Peter Jackson being shot by Legolas

- on DVD only

He makes a really funny face when it happens.

But in the end, no individual scenes matter but the film as a whole.

Important actors in this film are:

**oidsfj** sdoifj

**Elijah Wood** He plays Frodo

**Sean Austin** He plays Sam, Frodo's friend. I still remember him very well  
from his role as Mikey Walsh in The Goonies.

## 7 HTML

Here is some markup: `<b>not bold text</b>`

And a source block:

```
<b>pow!</b>
```

Finally inline: bold text

See org-mode manual [Quoting HTML tags](#).

## 8 Footnote

Here lies exact instructions <sup>1</sup> for random <sup>2</sup> noise.

## 9 Latex

*Trace execution using example:*

Assume  $\alpha = 9$ ,  $n = 16$  and  $x = 0$ .

Stack grows until base case  $2^x = n$ , thenunwinds.
